CAT EYE LACGEL COLLECTION

NEW

From September

Illusion that meets the eye! Unique texture, like colorful grains of sand that shift when applying a magnet over them. The way you hold the magnet over the gel polish layer determines how and where the color appears. It's time to experiment and create custom variations on nails!

HOW TO USE

After taking off the surface shine and prepping the natural nails, apply Perfect Prep, then Bond Gel Vitamine+ as base coat, and cure for 60 seconds. Apply two coats of the chosen color, curing each layer separately. Do not use the magnet on the first coat. After applying the second layer, create your design – straight line or curves – with the magnet, then cure it under the lamp. Finish with a flexible shine gel (e.g. Extreme Gloss Gel).

CURE TIME: UV 2-3 min., UV/LED 30-60 sec.

CAT EYE LACGEL MAGNET

The grains in magnetic gel polish react to the magnet placed over the nail. When using the square end of the magnet, the lighter color grains form a straight line, whereas curves or a wavy design can be achieved with the round end of the magnet.

Chrome Powder

PIXEL-FREE

Our new rose gold shade will match your clients' rose gold accessories perfectly. What is more, the subtle elegance of a rose gold sheen transforms nails into perfect custom accessories for any outfit!

HOW TO USE

Apply on halfway-cured, no-cleanse top coat (e.g. Speed & Shine Top Gel) with an ombre sponge. Start with applying the chrome powder by gently tapping it on the nail from the cuticle area up to the free edge. Then rub the applied powder layer on the nail to achieve the mirror effect. Finish with a flexible shine gel (e.g. Flexi Top Gloss).

Perfect tip

After rubbing the chrome powder on the surface of the nail, two coats of flexible top coat can be applied to increase durability. Sealing the free edge with top coat minimizes chipping.

PERFECT PIXIE

FINELY-MILLED GLITTER DUSTS

Suitable for use with nail polish, gel or acrylic. Apply on the nail surface to create nail art or sugaring, or encapsulate it for a glassy effect!

Limited edition!

HOW TO USE

Apply one coat of no-cleanse top gel (e.g. Speed & Shine Top Gel) and do not cure. Sprinkle Pixie dust on the nail surface, then cure completely.

SUGAR EFFECT

Perfect tip

This product can be mixed into a clear gel (e.g. LacGel Base/Top) to get complete coverage even if applied in a thin layer and to create sparkling designs within layers or on the nail surface.

OUR MOST RECENTLY DEVELOPED PRODUCTS

From September

Prepping nails is an extremely important step that should not be compromised. Adequate prepping yields top quality, durable and esthetically pleasing nail enhancements. The essence of perfect prepping lies in the details!

400 pcs/package | PNS304

NAIL PADS

Absolutely lint-free, strong and durable nail pads – perfect for removing the sticky residue from nails and cleaning your brushes. They efficiently remove dust particles and leave no lint behind.

By popular demand!

ACID PRIMER

Acid-based primer liquid with a pungent smell. Removes most of the water- and fat-content of the natural nail plate to achieve even better adhesion. This product is corrosive, so avoid all skin contact. It should only be applied on the natural nail plate. Do not apply on nail enhancements. Let it dry completely, then apply Perfect Bond Primer or base gel (e.g. Bond Gel Vitamine+, Elastic Hard Gel).

Perfect tip

Lightly pat the brush on a paper towel before applying the product on the nail plate.

Gel Effect Nail Polish

GEL-LIKE NAIL POLISHES

From September

When the weather turns colder, the season for applying gel polish on toes is over. Clients tend to request a pedicure with regular nail polish on a time-to-time basis – when planning a wellness weekend or having a classical mani-pedi day.

HOW TO USE

Take off the surface shine and prep the natural nails, then apply Base & Top Coat as base, and leave to dry for 1 minute. Then apply the first coat of Gel Effect nail polish. Allow 3 minutes for the first coat to dry, then apply the second coat and leave to dry for 5 minutes. Finish with Glass Coat shine.

Perfect tip

Before application, make sure to shake the nail polish bottle to release pigments from the bottom.

More flexible than regular nail polish!

5D MAGIC Cat eye

CAT EYE LACGEL COLLECTION

From October

Your client is indeed watching your hands, so this multi-dimensional magic is bound to happen in front of her eyes. Her nails will show a different color from each viewing angle, and the 5D magic magnet enables you to create various designs as well! Are you ready for some LacGel magic?
